Summary

Full-stack developer experienced in building end-to-end web applications with **Spring Boot**, **React.js**, **REST APIs**, **PostgreSQL Python**, and **Django**, . Gained enterprise exposure through a software development apprenticeship at Sony India. Building a strong foundation in system design, backend architecture, and responsive UI development. Committed to writing clean, maintainable code and continuously expanding through certifications and personal projects.

Experience

Sony India Software Centre Pvt Ltd June 2025 – June 2026

Software Developer Apprentice Bengaluru, Karnataka

- Administer **SAP Mozart landscape systems** for an enterprise environment, managing the full user lifecycle — from account creation and access provisioning to modifications and deactivation.
- Manage **role-based access control (RBAC)** by assigning, modifying, and auditing user permissions to ensure alignment with business requirements and the principle of least privilege.
- Maintain **authentication and authorization** configurations within SAP systems, ensuring compliance with organizational security policies and supporting periodic access reviews.

sectionSkills

Languages : Python, Java, C++

Cloud & DevOps : Docker, Kubernetes, Microservices, CI/CD, REST APIs

Frameworks : Django, Spring Boot, Spring, Hibernate, React.js

Databases & Caching : PostgreSQL, MySQL, MongoDB, Firebase

AI/ML : PyTorch, YOLOv5, LangChain4j, RAG (Retrieval-Augmented Generation)

Tools & Platforms : Git, GitHub, Linux/Unix, Postman, IntelliJ IDEA, VS Code, Maven

Soft Skills : Leadership, Quick Learner, Time Management, Agile Methodologies

Education

Mangalore Institute of Technology and Engineering December 2020 – May 2024

Bachelor of Engineering - Computer Science; CGPA: 7.26 Mangalore, Karnataka, India

Projects

FlightWise AI – Intelligent Flight Search & Recommendation Platform

Java 21, Spring Boot, React.js, PostgreSQL, Redis, Apache Kafka, Docker, LangChain4j, RAG June 2026 – Present

- Allows users to search, compare, and book flights, receive personalized recommendations based on price, airline, travel duration, departure time, layovers, and preferences, while providing admins with controls to manage flights, schedules, pricing, and bookings.
- Architected a scalable microservices-based backend using Spring Boot, Spring Cloud Gateway, Eureka Service Discovery, PostgreSQL, JWT authentication, event-driven messaging, and AI-powered conversational search, with a responsive React.js frontend styled using Material UI and Tailwind CSS.

AI-Based Dental Condition Detection System

Python, Flask Web Framework, YOLOv5, Javascript April 2026 – Present

- Developed an AI-based dental X-ray detection system using YOLOv5 and PyTorch to identify Caries, Deep Caries, Impacted Teeth, and Peripheral Lesions, with annotated bounding-box results
- Built a Flask web application using Python, OpenCV, HTML, CSS, and JavaScript that enables users to upload panoramic X-rays, process them through the trained model, and view/download the detected results.

Certifications

Full Stack Development in Java and Python | *KodNest Technologies* - June 2025

Java Spring Framework, Spring Boot & Spring AI (Generative AI) | *Udemy* - May 2026

Artificial Intelligence for Beginners: Python and AI Basics | *Udemy* - December 2025

Python For Beginners Course In-Depth | *Udemy* - April 2026
